To commemorate the release of AutoCAD 20, AutoCAD magazine has created a special issue called "Building Your Dream Home in 3D with AutoCAD". In this issue, an author named John Grass is using AutoCAD to build a home from the ground up. It's a great project and a great example of how AutoCAD can be used to design, create and collaborate on complex projects with others. The most recent version of AutoCAD is AutoCAD 2019. What is AutoCAD? The essential AutoCAD is an integrated suite of design, drafting and technical drawing applications which lets you quickly create, edit and organize three-dimensional

designs. It includes tools for architectural and engineering drafting, 2D and 3D engineering, mechanical, electrical, structural, piping, excavation, landscaping and other construction documentation. Although the last version of AutoCAD (AutoCAD 2007) does not use a viewer, the current version of AutoCAD is available on a web browser. In January 2016, Autodesk announced that AutoCAD will no longer be available as a standalone application and users will need to purchase AutoCAD 2016 or a perpetual license for AutoCAD. AutoCAD and other Autodesk products are now maintained by a new, internal team, Autodesk Applications, at Autodesk Corp., which is a subsidiary of a new Autodesk organization called Autodesk Inc. Directories Autodesk Exchange Autodesk Exchange Apps is a software development toolset consisting of user-

friendly software modules that are designed to meet the needs of Autodesk and third-party developers. It provides web based applications for electronic AutoCAD version drawing manipulation, editing and managing drawings, cataloging and browsing drawings, workgroup management and collaboration, 3D modeling and animation, product data management, and drawing review and commenting. Autodesk Exchange Apps also includes Autodesk Exchange Connect, which is a subscription web service that enables access to all of the exchange apps, including drawing modification, 3D modeling and animation, and product data management, as well as integration with other Autodesk applications. AutoCAD Exchange In early 2007, Autodesk Exchange Apps was converted into a service called Autodesk Exchange

(subscripted AE). The AE service provides many of the same functions as Exchange Apps, including website access to the exchange apps and Autodesk Exchange Connect. In addition, AE enables third-party developers to customize Exchange apps and integrate them into their own products. AutoCAD LT Exchange The latest version of AutoCAD LT is a web-based drawing authoring tool that has several advantages for small- and medium-sized businesses. It is intended for non-architectural CAD users to create 2D building design drawings and is similar in functionality to AutoCAD.
