Seven years of war between England and France is transformed into an addictive strategy game. The struggle for the control of North America turns into a clash between two superpowers. The fate of Europe and the wider world are at stake. Empire: Total War is an empire-builder. A real-time strategy game and a successor of the Empire: Total War series. Another huge World War, another huge game, another huge thing and yet another huge day. Over the last few days, I've been mindlessly playing the new Empire: Total War patch. It's a thing. A massive patch, even, and one which brings with it more than just large scale battles. Oh no, it's

---

got the gorgeous new setting of the North American colonies! I can't say that I did anything other than playing the game for most of the day, but it does feel a bit like Christmas – the real one, of course, as it usually is in the UK. There's a little of that, a little of focusing only on the Empire and the Patch itself, and then a bit of the more usual Christmas blogging that goes on. Empire: Total War has had a long road. Not a terribly long one in the scope of things, but a fairly long one as far as the patch goes. After the rather unsatisfactory pre-Empire: Total War titles, the direct sequel to the much loved Empire: Total War IV, has been a rather significant project. In fact, if you took away the Chinese Civil War and the American Civil War (though that would be a little unfair, since the

---

Chinese Civil War was largely a prelude to the American Civil War and didn't involve a large chunk of the latter), Empire: Total War V, a gazillion miles away from the Empire franchise as we know it today. But of course, this wasn't just the franchise "staying the same" (if you get my meaning) for those four years, with the developer wanting to invest in it. To say the least, they did. And of course, I almost immediately went and bought it, as soon as I heard they were getting around to it. And once I got it, I can't say that I found it terribly hard to buy - I could see the issue from previous patches and the cold, even worse than previous ones, appreciation that kept it from being one of c9d1549cdd

**(18590101) [ Table of Contents ] 1. Free Designer 2. Background** On my way home from college, I got off at the first stop. It was Shibuya, well-known for its vibrant liveliness, saturated with the spirit of young people. From the ground floor entrance to the storehouse, crowded with people - that was Shibuya. I decided to go inside and get a drink to calm down after a day of studying - what happened? I was amazed - I found myself in a world of 3D animated drawings! Characters strayed about, and even if they were finished plans, there was still the possibility of data that had not been inputted turning them into something else! It was an extraordinary reality, but what I was doing was very ordinary - as if I had not known that, I was asked to help design as one of Amazura's designers. I didn't mind, my heart was overflowing with joy - the feeling of being able to play around with countless possibilities even inside their experience! Shibuya. No, Saitama. The subway and Shibuya are different - Shibuya was a 3D world, Saitama too? Saitama! I just have to go to Saitama! My heart started pounding, my heart was shattered, my life was shattered. I was as if I had a girl waiting for me. I reached Akihabara, the father of anime, and I was thinking about how his original "world" was a world of manga, he then decided to recreate the performance in anime, that thought completely changed my whole view of the

**world. And I was overwhelmed by the energy produced by countless fans, by the spirit of this world. Here, I was overjoyed! All my pictures and my memories of my old home mixed together, and I felt as if I had come back to Saitama. The 3D world of Amazura. It's an instant seller, at the top of the news! The name "Amazura" is art in itself, and if it is becoming an instant seller, then I'd want to be an employee of Amazura. I was talking about it in the team, 2 of the three of us went**

70 BUGGED 22 Rated 3.5 out of 5 by 5 reviewers. Rated 5 out of 5 by Raddog Man, is this you... I love the

---

look of this game! The art style and the various dynamic elements of the game really give it some uniqueness. It's combat's moves are way better than normal twin-stick shooters, the difficulty is not too difficult, just has a realistic feel to it. The controls are good for the most part, I mean they are really good, until the "double-jump" abilities. If you fail to "double jump" or leave a weapon or character behind then you will fall and be unable to use that weapon or character again till you get a replacement for it, pretty much eliminates the advantage of those things in the game. Also the game is very restricting in its weapons, I would love to have a weapon that has a weapon length of 2 or more, an unlimited amount of

---

ammo, grenades, and a chance at getting custom colors, but that's about it, the other weapons are useful, but they are very limited. Overall though, it's a fantastic game, even though it has some flaws but they aren't serious. One major flaw is that you will NEVER get all the trophies, if you pay attention to the scoreboard you will notice how many times your score increases while enemies are on the same level. Thankfully it's just cosmetic, but it's just the small things that bug me about the game. Rated 3 out of 5 by Jumper90 Nice, but only if you remember to unlock everything I really love the soundtrack for this game and the dynamic camera modes are a nice addition to the game. I think it

---

would be a nice feature to have a trophy that shows the level of progress that you are making
